HIGH PERFORMANCE

The experience accumulated through years of intensive research in the competition field has allowed Brembo to create product lines that are differentiated on the basis of the application types and different research and development procedures adopted.

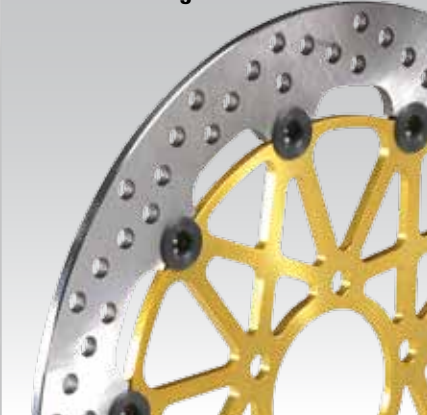

Thanks to the results obtained, motorcycle sports enthusiasts who insist on replacing original brake systems with Brembo High Performance equipment are able to improve their riding style in terms of performance and safety while also ramping up the overall aesthetic appeal of their machines.

Hoco Parts supplies the full Brembo High Performance & Racing range.

The MAGIC of the Forged Wheel

The performance and design of Marchesini wheels combine in a unique and unmistakable style. Their aesthetics together with their unrivalled quality have become the benchmark in the motorcycle wheel industry. Thanks to a careful and accurate design, Marchesini wheels achieve the maximum adaptability of fitment for the worlds leading motorcycle models. The continuous technical solutions introduced by Marchesini's design department adapt the functionality of the wheel to a winning design.

All Marchesini wheels are made by using the 3D "Multi directional" forging process.

R&G SHOCK TUBE

- Waterproof, vented tube, made from top quality, bonded 100% CR Neoprene™ which is double lined with stretch nylon on both sides.
- Prevents damage from road salt, water spray, stone chipping, dust and dirt.
- Very easy to install (without removing the shock).

Dynojet Power Commander

PC III usb

- Easy fuel remapping
- No cutting or splicing in the original loom
- For custom remap or free downloadable maps

PC V

- Same characteristics as the PC III
- Smaller than PC III
- More adjusting possibilities

Secondary Fuel Module

- Will connect the upper 4 injectors with the PC V
- For programming all the injectors, for bikes with 2 injectors per cylinder
- Must be used in combination with the quick shifter on bikes with 2 injectors per cylinder (no QEM needed)

STAGE 1 JET KITS

Intended for motorcycles with a stock engine using the stock airbox, air filter and stock pipe. Stage 1 kits are fully adjustable to allow the use of a well designed aftermarket pipes and stock replacement air filters like K&N. Stage 1 kits are designed to improve throttle response and driveability and in most cases power increases of approximately 5% throughout the entire power range can be achieved.

STAGE 2 JET KITS

Intended for motorcycles with a stock or mildly tuned engine using a well designed aftermarket pipe with a modified airbox and a stock replacement air filter. Stage 2 kits are designed for applications where individual filters cannot be installed and for applications where airbox modification improves the engine's performance. In most cases power increases of approximately 8% can be achieved.

STAGE 3 JET KITS

Intended for motorcycles with stock or mildly tuned engines using a well designed aftermarket pipe and individual air filters. In most cases power increases of 10-15% can be achieved. However driveability may be compromised particularly with short stroke, high rpm motors. On some modern engine and airbox designs, individual filters and proper jetting offer no performance improvement yet compromise driveability, in such cases stage 3 kits are not available.

The ABUS logo is a red rounded rectangle with a white border, containing the word "ABUS" in white, bold, sans-serif capital letters.

ABUS

The word "DATATOOL" is written in a bold, red, sans-serif font with a white outline, positioned over a background of a motorcycle wheel and disc.

DATATOOL

The slogan consists of three lines of text in a red, italicized, sans-serif font, stacked vertically. The background is a close-up of a motorcycle wheel with a yellow ABUS padlock on the disc.
